

# Recommendations on Sampling

## Toothpick Test:

**Step 1:** Fill a 3-6oz glass with beer

**Step 2:** Dip toothpick in Hopzoil

**Step 3:** Stir toothpick into the glass of beer.

**Step 4:** With toothpick submerged, wait 60-90 seconds for Hopzoil to diffuse into the beer.

**Step 5:** Evaluate and Compare.

## Keg Test Dosing:

**Step 1:** Start with existing base beer (finished).

**Step 2:** Measure 2.5ml Hopzoil for 1/2-BBL keg

**Step 3:** Always test with a control batch, not a new recipe.

**Step 4:** Spike keg using an inline transfer, or partially fill keg, add hopzoil dose, complete fill.

**Step 5:** Evaluate and Compare.

**HOPZOIL**
